Schedule

The manual is "almost done".

Really.

Updates since last version (the August 14th, 1996 draft):
- Minor errors throughout have been fixed
- User-interface chapter is more complete
- (Sloppy) index
- Current with Soar 7.0.4

Updates to Come

Will be done in time for AAAI (end of July).

Still to be done:

- Current with Soar 7.1, e.g.,
    - Redo examples in user-interface chapter
    - Checks by Karen et al.

- Consistent index
- Appendices (wanna help?):
    - Grammars are incorrect (or maybe not)
    - Discussion of O-support is incorrect

Availability

- Current draft (as always) available via Clare's UofM web page:
  `http://ai.eecs.umich.edu/people/congdon/`
- Announcement to `soar-group` when final version is complete (end of July).
- Distributed through Soar Archives at that point.
